2 Day Prosthodontic Training Program

DATES

Friday 26/07/2024
Saturday 27/07/2024

FEES

Registration fee: \$2,530
including GST

VENUE

Dental Artistry Training and Education Centre
Level 1/38 Broadway, Newmarket, Auckland

This 2-day prosthodontic training program covers the essentials of Implant Removable Prosthetics. It starts with a comprehensive literature review to ensure you have the fundamental knowledge to execute predictable implant prosthetic rehabilitations. This gives a solid foundation to understanding the 'WHY' of implant over dentures. The course will have hands on training so you learn the 'HOW' and live patient demonstrations of the critical steps so you can relate the teaching to a clinical setting. The program will cover the different designs of implant supported over dentures (RP4) and implant stabilized over dentures (RP5) including Locator®, Equator®, Dolder and Hader bars as well as fully milled precision bars.

Detailed documentation of multiple cases will be utilized to cover all the various clinical prosthetic rehabilitation scenarios using the above systems.

Fellow of Royal Australasian College of Dental Surgeons, International Dental Implant Association and International Academy of Dentofacial Esthetics.

Dr Sheng Zhang is a general dentist with a special interest and practice limited to periodontics and implantology. He has studied extensively around the world learning from the leaders in the field. Dr Sheng is a published author, and his thesis was on Albumin Concentrated Growth Factors (Alb-CGF) in the sinus lift procedure. He has developed novel techniques with the use of autologous blood concentrates as an adjunct to guided bone regeneration.

Dr Sheng has specifically designed this course for those experienced implantologists wishing to expand their GBR skills. He will be showing you highly predictable techniques which works in general practice.

Dr Sheng Zhang

Dental Artistry Practice Principal

BDS (Adel), BOH (Syd), MDS Periodontics/Implantology (UJI), GradDip Orthodontics (JCU), FRACDS, FIDIA, FIADFE

Day 1- Friday 26/07/2024

1. Introduction to dental implant removable prosthesis
2. Rationale for dental implant over dentures
3. Understanding the different types of implant over dentures
4. Prosthetic driven surgical implant treatment planning for implant over dentures
5. The difference between Implant Supported (RP4) and Implant Stabilised (RP5) prosthesis
6. Key implant positions to support various implant prosthetic solutions
7. Impression taking techniques
8. Verification jigs and their uses
9. Critical steps in the dental implant over denture workflow

Day 2- Saturday 27/07/2024

1. Hands on training of critical steps in the implant over denture workflow
2. Uses of intraoral scanners for implant over denture workflow
3. Deep dive into cases and detailed assessment of each critical step
4. Guest lecture from master dental technician on the keys to success
5. Trouble shooting common problems in implant over denture cases
6. Mock patient cases to test applied knowledge from the course
7. Live patients to demonstrate critical steps in the implant removable prosthesis workflow
