Join us for an immersive one-day introductory course on the Bioclear Method, developed by renowned clinician Dr. David Clark. This course is specifically designed to provide dentists with exposure to the revolutionary techniques and materials used in the Bioclear Method, with a primary focus on heat injection overmoulded composite. Through interactive lectures, hands-on exercises, and practical case scenarios, participants will gain the necessary skills to effectively handle and implement this innovative approach in their clinical practice.

### Course Objectives: Upon completion of this course, participants will:

1. Understand the fundamental principles and clinical applications of the Bioclear Method.
2. Gain proficiency in utilizing the heat injection technique for overmoulded composite, a cornerstone of the Bioclear Method
3. Learn how to restore an anterior Black Triangle, achieving optimal anatomical contours and a natural, seamless appearance
4. Acquire the skills necessary to create snug, smooth Class II molar restorations with broad contacts using the Bioclear Method
5. Develop proficiency in contouring and polishing techniques to achieve a brilliant smooth finish on restorations, enhancing both aesthetics and longevity
